20 ноября 2012

Издательство Elsevier

Дерево ясеня, обвитое виноградной лозой, символизирует единение ученых, стремящихся к плодам просвещения - ученый, стоящий под деревом не одинок, он связан со всем читающим сообществом

- Издательский дом Elzevir Основан в 1580г.
- Первый научный журнал опубликован в 1823г.
- Современное научное издательство Elsevier воссоздано в 1880г.

The Elsevier Heritage Collection

The Elsevier Heritage Collection consists of over 2000 volumes with more than 1000 distinct titles published by the original House of Elsevier from 1580 to 1712. The collection is divided into our core collection, of around 1500 volumes and a reserve or "duplicate" collection. Approximately 400 non-Elsevier antiquarian titles and over 30 reference titles are also preserved in our museum quality, acclimatized display shelves in our Elsevier headquarters in Amsterdam.

Explore the Highlights of the Collection:
24 of the Elsevier's most remarkable gems

Browse the Online Catalogue

Кулинарная книга 1655 года – cook book, 6 поколений семьи Эльзевиров руководило компаний, изд.дом создан братьями Эльзевирами через несколько лет после основания Лейденского университета, издавали книги Декарта, Галилея, Эрасмуса

Refine

Q

Tips

Getting Started with Hub

1

Enter a few terms, sentences, or even paragraphs in the search box above. Click on "Refine" for a little extra help. Example: **gene therapy subtype (fta) year (2012)**

2

Browse, refine, and save results from millions of journals, patents, and scientific web content.

3

Watch one of our [Online Tutorials](#) for a few more tips.

Highlighted Content for Search

Full-Text Journal Content from
18 Scholarly Publishers

Featured Applications

 **Altmetric.** Measure the social media buzz that articles receive

 **Figure Search.** See captions with your image search results for more context.

 **Share.** Share articles to Facebook, Twitter or CiteULike

 **Keyword Optimizer.** Find the right keywords for your Hub search

Register or Login to use these apps in SciVerse

Methods Search

Find relevant methods by searching only in the Materials and Methods section of Elsevier full text articles.

Find Methods

Note

To restrict your search to a specific field, include a field name in your search using the formats shown below. The Hub Advanced Query Builder inserts these fields for you as you enter your search terms on the appropriate tab. See [Using the Advanced Query Builder](#) for details.

Alternate Field Name	Hub Preferred Field Name	Description
NON-ENG-ABST STEREO-CHEM-ABST ABSTRACT ABSTR	ABS	The full text of a document's abstract; all types of abstracts (e.g., non-English text) are included in this search Example abs(oxidation)
AF AFF AFFILIATION	AFFIL	The institutional or corporate name or address of the document's authors Example affil("university of hong kong")
N/A	AFFILCITY	The city associated with the institution or corporation (from Scopus) Example affilcity(columbus)
N/A	AFFILCOUNTRY	The country associated with the institution or corporation (from Scopus) Example affilcountry("united kingdom") Note Specific country names have been indexed. For example, use <i>united states</i> (not <i>USA</i>) when desiring US search results. Refer to the index of country names for exact spellings required.
N/A	AFFILORG	The affiliation organization (from Scopus) Example affilorg("university of toronto")
N/A	ALL	Insert ALL in your query to search all fields Note Using ALL in your query only the fields shown will be searched
AU AUTHOR AUTHOR-NAME AUTHORFIRST AUTHLASTNAME AUTHFIRST	AUTH	The name of the author of the document Example auth(smith)

Overview

The Search Translator translates your non-English search query and performs a search utilizing the translated query on SciVerse Hub. The Search Translator is powered by the Google Translate API and supports 52 languages. The Search Translator is available on the SciVerse Hub home page and the search results page.

After adding the Search Translator to your account you can begin using the application by following these steps:

1. Enter your non-English search query into the Search Translator
2. Choose the language of the query you entered
3. Press the submit button

The translated query will now be entered into the Hub search box and a new search will be performed using that query. Please review the query in the Hub search box after choosing to submit to ensure you are satisfied with the translation. Please keep in mind that a query submitted from the ScienceDirect search results page will take you to the Hub search results page.

If you would like to find out more information about Google Translate, please go here <http://translate.google.com>. For a technical description of how this application was built please visit the [Example Application Page for Search Translator](#).

Title

Social gating and pedagogy: Mechanisms for learning and implications for robotics

Keywords

Social gating, Pedagogy, Early social cognition.

Abstract

It seems self-evident that human responsiveness to social input enhances learning, yet the details of the social forces at play are only beginning to come into focus. Recent research on language and cognitive development in preschoolers and infants illuminates mechanisms such as social gating and natural pedagogy and specific ways in which they benefit learning. We review such advances and consider implications of this research for designing robotic systems that can harness the power of social forces for learning.

Article

Open a text on children's development and one is almost certain to find, somewhere, William James' famous "blooming, buzzing confusion" (James, 1890, p. 462) attribution regarding infants' phenomenological experience. This is almost invariably followed by a statement that in some form denies the validity of James' way of conceiving of early experience, given the abundant evidence now documenting even tiny infants' skills for organized processing of the complex flow of sensory input. One among these skills—perhaps an especially powerful and heuristically valuable skill—is rarely mentioned in this context, however. This is the skill of sociality. Infants' experience is saturated with social interactions and social cues that have the potential to facilitate emotional, cognitive, and linguistic development. Fortunately for their learning's sake, infants typically are intensely responsive to all this social input. For example, face-like forms hold special fascination for them from birth (e.g., Johnson, Ozuravicz, Ellis, & Morfitt, 1991) and they are attuned to having the focus of another's attention from at least as

КАК НАПРИМЕР НА Ю

Статья в не читан - не любил, нечего читать книгу так читать. Сидишь за книгой, сидишь и сидишь. И без ума от традиционных статей. И конечно же, не забудь про Ю.

(Слова для детей)

Эта, если не чаще, то чаще всего цитируемая статья Левинтона многократно была предметом, если не обсуждения, то по крайней мере упоминалась в работах, посвященных рифме, или поэтике Левинтона. Смысл этой работы заключается в том, что Левинтон, анализируя, анализируя, анализируя...

Free access to a variety of articles by 2012 Nobel Prize Laureates

Eight of the nine individuals honored with 2012 Nobel Prizes had a record of publishing in Elsevier journals. These Elsevier authors won Nobel's in four of six categories. The winners came from the traditional sciences of chemistry, physics and physiology/medicine as well as the so-called dismal science of economics.

In recognition of these extraordinary scholars and their contributions to science, we are pleased to provide free access to a variety of their research articles published in Elsevier journals. Brought to you by ScienceDirect.

Overview

Researchers are often searching for a comprehensive information resource given only a few keywords. How does one find a book if title, ISBN, authors or subject are not available? Scientific Book Finder offers solution to this problem: simply enter your keywords and it will search over 11,000 Elsevier online books. The results will be presented in relevant-most order with actual number of keyword occurrences per book. Click on the book title will open book homepage on ScienceDirect.

Related reference work articles

Highlights

► The essential oil of *Malania oleifera* from seeds, branches with leaves and (exocarp and mesocarp) is researched respectively. ► The major constituents of essential oils include benzaldehyde, benzyl alcohol and benzeneacetonitrile. ► The fatty acid of *M. oleifera* seeds is extracted by steam distillation and determined by GC-MS techniques. The yield is $60.5 \pm 2.5\%$, and the major components are nervonic acid (55.70%) and octadecenoic acid (23.81%).

Related articles

Related reference work articles

Highlights

► Chemical composition of grape skins from red grape pomaces was assessed. ► Cellulose and hemicelluloses were the most abundant components. ► No lignin was detected in grape skins. ► The most abundant extractive in dichloromethane was oleanolic acid. ► The scheme for the comprehensive utilization of grape skins was proposed.

Science Direct

Полнотекстовая база данных [ScienceDirect](#) является непревзойденным Интернет-ресурсом научно-технической и медицинской информации и содержит 25% мирового рынка научных публикаций.

Разработанная для удовлетворения потребностей научных, образовательных, коммерческих и правительственных организаций в поиске информации на политематическом уровне, платформа [ScienceDirect](#) обеспечивает всесторонний охват литературы из всех областей науки, предоставляя доступ к более чем 2500 наименований журналов и более 11000 книг из коллекции издательства «Эльзевир», а также огромному числу журналов, опубликованных престижными научными сообществами. Помимо этого, с помощью системы CrossRef можно перейти по ссылкам к содержанию работ в области науки, техники и медицины, опубликованных более 1000 других издательств.

Интуитивно-понятный интерфейс обеспечивает исследователям доступ к более чем 10 миллионов полных текстов в формате PDF и HTML* и предоставляет гиперссылки на целый ряд научно-технических и медицинских статей на платформах других издательств. Платформой [ScienceDirect](#) пользуются более чем в 70 странах. Ежемесячно с нее скачивается несколько миллионов статей, при этом содержание платформы пополняется
